

The latest addition to the Ralliwolf range, the COMMANDO 50 Pivot Magnet is specifically designed for drilling on curved, uneven surfaces. With its permanent magnet, the COMMANDO 50PM retains magnetic adhesion, even on thinner surfaces.

- Maintains strong grip on curved steel and pipework down to 3.5mm material thickness.
- Can be also used for standard flat surface drilling.
- Twist drill, threading and countersinking capability.
- Permanent magnet technology – magnet does not require electrical power.
- Double pivoting magnet base – two separate magnets allowing machine movement in-between drilling for inspection & debris removal without losing position.
- Safe and hidden away internal cabling.
- Mounted coolant bottle, steel sliding guard and switchable handle.
- Centered control panel with Cutsmart™ for increased tool and machine life.
